

SEPTIKON

INSTALLATION SPECIFICATION

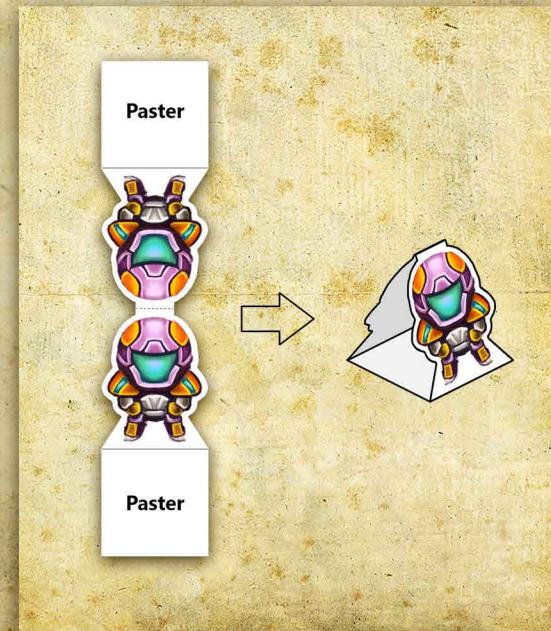

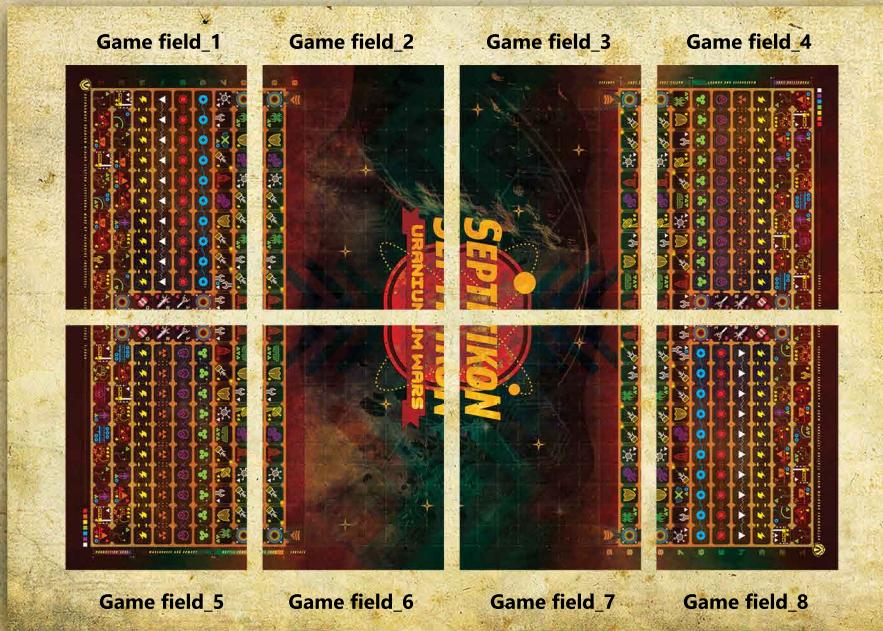

Congratulations! You have bought an instruction for Septikon.
The best industrial space station for mining and processing uranium.

Here you will find:

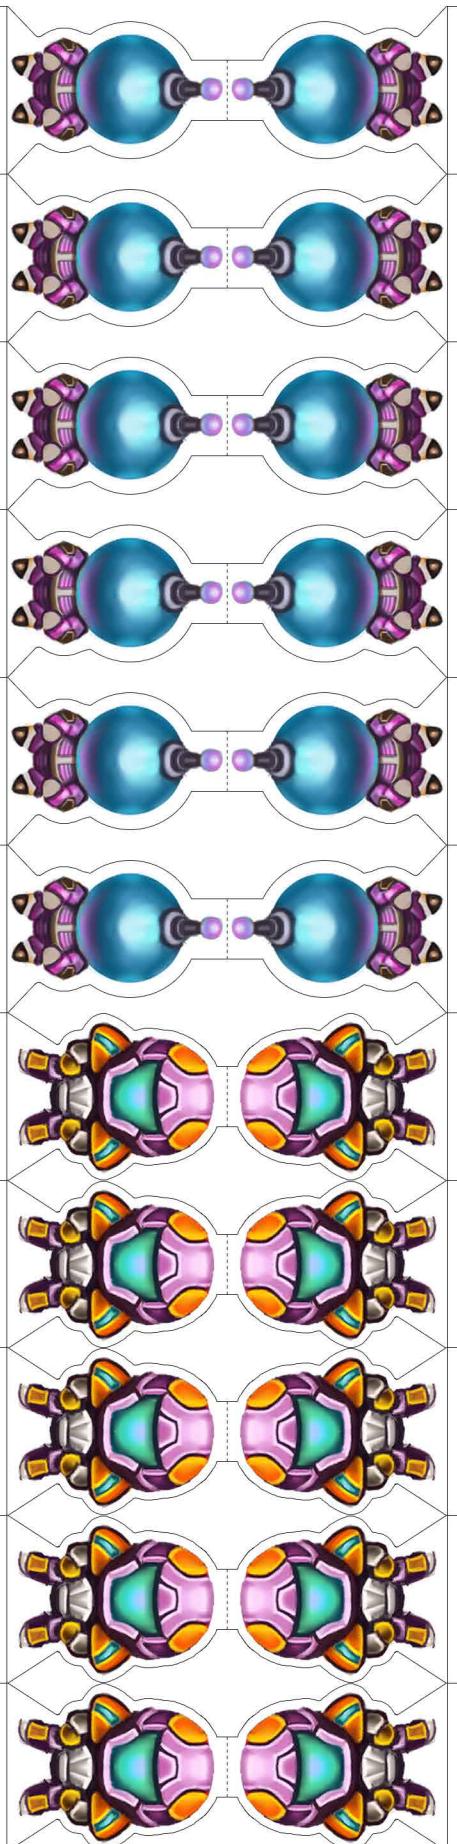

- "Clones1 & Biodrones" - a sheet with capsules with purple Clones for the first battle station. On the same sheet you will find Biodrones for both stations.
- "Clones2 & Rockets & Nuclear rockets" – a sheet with rockets and nuclear rockets for both stations. On the same sheet you will find blue clones for the second battle station.
- "Energy shields & Satellites" – a sheet with defensive systems which includes Satellites and Energy Shields for both stations.
- "Damage markers" – a sheet allowing you to print damage markers.

To fully equip your mining station you should also add:

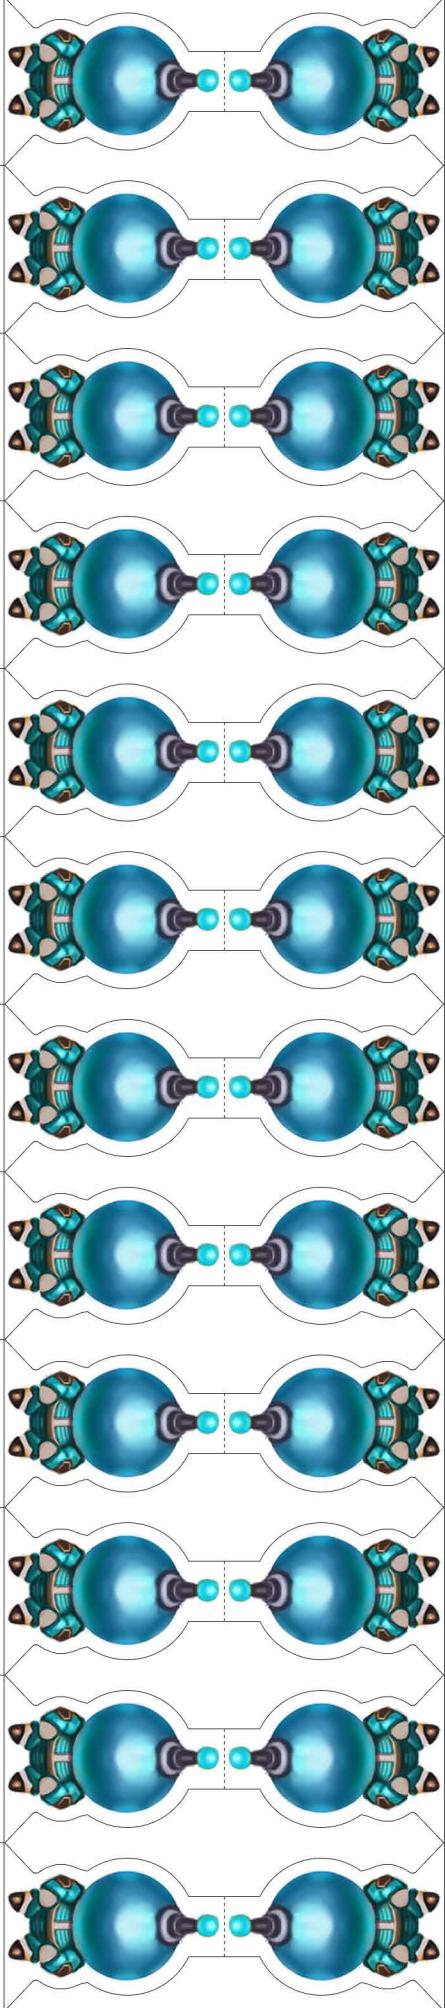

- 2 D6 dice
- Approximately 120 wooden pieces of 5 colors for resources (Uranium, Metal, Energy, BioMass, Oxygen)
- Scissors and glue to assemble your crew and your station.
- Rulebook and Reference Sheet from Septikons' BGG page
